Building Permit Application

Checklist — Mixed Use, Downtown District

INFORMATION REQUIRED FOR A DEVELOPMENT PERMIT

The following information is required to review and evaluate your Development Permit application in a timely matter.

To expedite the application review, all submitted materials must be clear, legible and precise. Accurate and legible drawing are required (rough sketches are not acceptable).

Applicant	Office	Required Items
o	o	Completed Development Permit Application
o	o	Off-Site Levies (if applicable)
o	o	Abandoned gas well map (if proposed building is larger than 35 m ²)
o	o	Site Plans – to be scaled and dimensioned showing: <ul style="list-style-type: none"> • Municipal Address and legal description (Lot, Block, Plan) • Property lines • Front, rear and side yard setbacks from property lines • North arrow • Easements and utility right-of-way • Lot grades (including building grades at all corners) • Foundation outline of the principal building and outline of eaves and any other projections • Outline and location of any accessory building • Driveway or parking areas (including width and length of all stalls) • Retaining walls (existing and proposed) • Adjacent municipal streets, sidewalks, curbs and proposed curb cuts • Location of existing or proposed water, sanitary sewer, gas and electrical lines
o	o	Blueprints – to be scaled and dimensioned showing: <ul style="list-style-type: none"> • Exterior of proposed building, including windows doors, projections, decks, etc. • Exterior finishing materials, and roofing materials • Lot grades, building grades, and grade line plotted on each of the building elevations (consistent with the Site Plan) • Elevation of any fence or retaining wall proposed on the site • Layout of all exterior and interior wall and identify rooms (eg kitchen, living room, bedroom, etc.) • Dimensions of buildings (length & width; include cantilevers and other projections.

The Development Authority may require additional material/information necessary to properly evaluate the proposed development.

o	o	Site Drainage Plan (if required) to be signed and stamped by a qualified engineer showing: <ul style="list-style-type: none"> • Computation of site area • Finished grade elevations • Paved and unpaved areas • Surface drainage patterns • Catch basins with both top and invert elevations • Storm water retention areas, with calculations
o	o	Detailed letter of intent including: <ul style="list-style-type: none"> • Detailed description of the proposed development and use • Description of products and services • Anticipated on-site operations (indoors and outdoors) • On-site storage • Transportation details including size of vehicles/expected frequency of trips • Number of employees • Hours of operation

The Development Authority may require additional material/information necessary to properly evaluate the proposed development.

M-DWT Mixed-Use, Downtown District

PURPOSE: To provide for a broad mix of pedestrian-oriented retail, residential and public service uses in the Downtown to serve the Town and surrounding area, while recognizing the architectural integrity of the area.

PERMITTED USES:	DISCRETIONARY USES:
Animal Service (Minor)	Accessory Building/Structure
Art and Craft Studio	Cannabis Retail
Care Facility (Clinic)	Care Facility (Child)
Establishment (Eating) (Entertainment)	Dwelling (Apartment) (Multi-Unit)
Financial Institution	Dwelling Units (Second Floor Only)
Government Services	Drive-Through Business
Office	Establishment (Drinking)
Retail (Liquor) (Small)	Farmers’/Flea Market
	Funeral Facility
	Hotel/Motel
	Recreation (Culture and Tourism) (Indoor)
	Religious Assembly
	School (Commercial)
	Transportation Service

Those uses, not otherwise defined in the Bylaw, which in the opinion of the Development Authority are similar to the Permitted or Discretionary Uses and conform to the purpose of this District.

MINIMUM PARCEL SIZE:

Development Type	Parcel Size	Parcel Width
Non-Dwelling Development	At the Discretion of the Development Authority.	At the Discretion of the Development Authority.
Dwelling (Multi Unit)	500 m ²	7.5 m per unit (9.0 m on corners)
Dwelling (Apartment)	1000 m ²	---

MAXIMUM BUILDING HEIGHT: 15.0 m (Principal Building)
4.5 m (Accessory Building/Structure)

MINIMUM SETBACKS:

PRINCIPAL AND ACCESSORY BUILDINGS		
Front Yard	Side Yard	Rear Yard
0.0 m	0.0 m with Firewall	0.0 m, except where space is needed at the rear for parking, loading or garbage storage.
	1.5 m where side-yard provided	
	3.0 m adjacent to Residential District	

ADDITIONAL REQUIREMENTS:

- a) The orientation of buildings and site features shall have minimum adverse effects on surrounding residential properties.
- b) Facades shall be designed to create architectural order and harmony in the townscape.
- c) Outdoor storage and display shall not be permitted except for sidewalk sales.
- d) Garbage storage shall be screened and confined to a designated area and shall not have an adverse affect on the use or circulation on the parcel or adjacent lands.
- e) No shipping containers are allowed in this District.
- a) No recreation vehicles are allowed in this District.

DEVELOPMENT PERMIT APPLICATION

1. Failure to fully complete this form and/or supply the required information may result in a delay of the application process.
2. Development Permit fees must accompany this application prior to its review.
3. A Development Permit does not become effective until the appeal period has expired or until any made appeal has been heard and a decision rendered.
4. If a decision has not been issued within 40 days of the date the application is deemed refused. An appeal of the refusal may be made to the Subdivision and Development Appeal Board within 14 days.
5. A Development Permit shall be void after 12 months of no progress.
6. A Development Permit is NOT a Building Permit or Business License. Any approvals granted regarding this application does not excuse the applicant from complying with Federal, Provincial, or other Municipal requirements.
7. The Development Permit does not override conditions of any easement, restrictive covenant, architectural controls, or agreement affecting the building and/or lands. The Applicant is still responsible to comply with any and all of these conditions.
8. An authorized person designated by the municipality is allowed to enter subject land and buildings for the purpose of an inspection with respect to this application only. The time and date of inspection to be mutually agreed upon by both parties.

I have read, understood, and agree to the above information. The information I have provided is true, and to the best of my knowledge and abilities, is accurate and complete.

Personal information collected on this form is collected in accordance with Section 4(c) of the Protection of Privacy Act. Please note that such information may be made public. If you have any questions about the collection of information, please contact the Town of Redcliff's Information Coordinator at 403.548.3618 or contact via email at redcliff@redcliff.ca

DEVELOPMENT FEES

The following fees are as per Fees, Rates and Charges Bylaw and are subject to change without notice. The entire Bylaw can be found on the Town of Redcliff's website at www.redcliff.ca.

1. Fees shown are base fees and do not include extra fees for MPC meetings, special MPC meetings, Land Title surcharge, etc. These other fees will be added to the base fee as required.
2. Development fees are based on delivery of the decision within 40 days. This may be shortened to 15 days by paying double fees including a doubling of MPC fees.

Non-Residential

Change of Use, Existing Building – Permitted	\$55.00
Change of Use, Existing Building – Discretionary	\$110.00
New Build Commercial/Industrial/Horticultural/Institutional Buildings	
Base	\$220.00
Per m ² fee	\$0.25
Accessory Buildings/Additions (less than 100 m ²)	\$110.00
Demolition (if not part of a Development Permit)	
Base	\$65.00
Per m ² fee	\$0.05

MPC & SDAB

Special MPC – additional fee above application and regular MPC fee	\$300.00
Variance Fee	\$250.00

Construction Damage Deposit

Residential	\$2000.00
Commercial/Industrial/Institutional/Horticultural	\$5000.00

Note: A construction damage deposit may be taken for development permits issued for principal buildings, accessory buildings, additions, excavations and/or demolition permits.

Work started before permit issuance is subject to double permit fees.

Whether you are landscaping, building a new fence, deck, garage, or simply planting a garden, disturbing the ground on your property can cause damage to a buried utility. Some utilities are buried mere centimeters below the surface.

The result of a contact with a buried line can range from loss of an essential service for you or your neighbours to serious injury or fatalities. The financial costs of repairing any damage you cause to a buried utility will be borne by you, the excavator.

Step 1: Submit your locate request online or by phone
To request that buried utilities on your property be located and marked, Submit a request online anytime at www.clickbeforeyoudig.com or call [1-800-242-3447](tel:1-800-242-3447) (Monday – Friday, between 8:00am and 4:30pm). Plan ahead and place your request at least three full working days before you start your project.

Step 2: Wait for the locate to be completed
Once you have submitted your request, the utility owners are responsible for contacting you. There are three ways your request can be resolved:

1. The utility owner may contact you and let you know that there are no buried utilities located in your dig space. They are obligated to provide this information in writing as well.
2. The utility owner may mark the buried lines on your property. In this case, they will provide you with documentation explaining the markings and how to proceed.
3. The utility owner may contact you to schedule a time to meet at the dig location. For example, if your dig location is located behind a locked fence, you will need to arrange to meet the locator on site.

Step 3: Identify any customer-owned utility lines
Customer-owned lines, such as water and sewer service lines, sprinkler systems, and any lines connecting buildings on a property, are not registered with Utility Safety Partners. The utility owners do not know the location of these lines, so it is your responsibility to identify them.
Contact a private locator to mark any customer-owned utilities in your dig area.

Step 4: Dig with care
Locate markings identify the approximate location of buried utilities and do not identify the depth of the line. If you're digging within one metre on either side of the markings (or five metres from high pressure pipelines), carefully expose the line with hand tools to determine its exact location and depth. If you have questions about digging close to a utility, contact the utility owner.

Advisory Land Use Planning Notes on New Regulatory Requirements for Surface Development in Proximity to Abandoned Wells

Introduction

An amended Subdivision and Development Regulation (Alberta Regulation 160/2012) comes into force November 1, 2012. New provisions were added to ensure abandoned wells are accommodated during future subdivision and development. These planning notes provide important information to municipal officials, planners, development officers, developers and landowners on the new provisions for abandoned oil and gas wells and how to accommodate them within areas where development, subdivision, or construction may occur. These mandatory provisions must be complied with when preparing municipal subdivision and development plans, other statutory plans, and/or land use bylaws. Municipal subdivision or development authorities evaluating development permit and subdivision applications must ensure these provisions are applied prior to issuing approvals.

The Issue

The location of oil and gas wells that are being drilled or are actively producing is evident, both from the surface and through a notation on the land title. Abandonment of an oil or gas well occurs by rendering the well incapable of flow and placing a cap over the casing approximately one meter below the surface. Energy Resources Conservation Board (ERCB) *Directive 020: Well Abandonment* sets out minimum well abandonment requirements to be met by the licensee of the well to ensure the integrity of the well and protect public safety and the environment.

After surface reclamation is complete and a certificate is issued by Alberta Environment and Sustainable Resource Development, the well site lease notation may be removed from the title. At this point, there is nothing visible on the surface or on the title to indicate the presence of an abandoned well.

Abandoned wells rarely require maintenance but adequate access to the site needs to be maintained should a leak occur. The abandoned well bore is not visible on the surface and therefore may represent a risk to excavation and construction equipment and safety of the equipment operator if abandoned wells are not properly located.

The risk to the public from an abandoned well is very low. *ERCB Directive 079: Subsurface Development in Proximity to Abandoned Wells* sets out a minimum setback distance from the well that must be maintained between abandoned wells and development as well as requirements for accurately locating the abandoned well and verifying its integrity prior to development. The amended Subdivision and Development Regulation requires municipalities

to confirm if abandoned wells are present as part of a subdivision or development permit application review. Where an abandoned well has been identified in the review, the municipality shall ensure that ERCB setback requirements are applied to allow for both well site access and prevention of accidental contact of a well bore with construction equipment.

In summary, it is the responsibility of the developer or landowner (proponent) of the proposed subdivision and/or development to take measures to identify any abandoned wells within that property and to apply the required setback as set out in the ERCB directive. It is the responsibility of the municipality, as part of the subdivision and development application process, to ensure that the proponent of the subdivision or development has taken these measures and has applied the required setback. These efforts will ensure that abandoned wells are appropriately identified and suitable setbacks are incorporated in planning, development and construction decisions. The information that follows in this bulletin further explains these processes.

Obtaining Abandoned Well Site Records

The developer or landowner (proponent) of the proposed subdivision and/or development must obtain abandoned well information from the ERCB. This information can be obtained from the ERCB's Abandoned Well Viewer available on the ERCB website at www.ercb.ca. The viewer will provide a map identifying all abandoned well surface locations in the selected area and a listing of additional details, including the licensee of record, surface location, latitude and longitude, and fluid type of each well. If it appears that a potential conflict between abandoned well locations and proposed surface development may exist, the proponent must contact the licensee of record for any additional information that may be required or to physically locate the well. If the proponent is unable to contact the licensee of record using the information provided, the ERCB may be able to assist with additional contact information. To obtain clarification about the information provided by the Abandoned Well Viewer, or if you do not have Internet access, contact the ERCB Customer Contact Centre by telephone at 1-855-297-8311 or by e-mail at Inquiries@ercb.ca or contact Information Services by mail at ERCB, Suite 1000, 250 - 5 Street SW, Calgary AB T2P 0R4.

The ERCB has been administering the abandonment of oil and gas wells since January 1945. The ERCB may not be aware of all wells drilled and abandoned before 1945, and records for a small number of wells abandoned before this time may not be complete because the data was not available. ERCB records may only provide general information on how these wells were abandoned. In such cases, the licensee of record should be contacted by the proponent for detailed information and verification of well data. If the licensee of record no longer exists, the proponent may contact the ERCB for assistance.

Setbacks from Abandoned Well Sites

ERCB Directive 079: Subsurface Development in Proximity to Abandoned Wells (www.ercb.ca) sets out detailed requirements for accommodating abandoned wells during subdivision and development. The Directive specifies that development on top of an abandoned well will not be permitted and a minimum setback of a five metre radius around the well must be maintained. The proponent is strongly encouraged to also consider providing an access route to the well wide enough to allow vehicle entry to the site. The licensee of the well is responsible for determining if

the well was abandoned to an acceptable standard and if there are any existing well integrity issues that require repair prior to surface development taking place.

Applications for Subdivision and Development Permits

Subdivision Application

Application Process

- New subdivision applications, except for lot line adjustments, must include documentation from the ERCB identifying the presence or absence of abandoned wells. Documentation can be obtained from the ERCB using the online Web Viewer.
- If an abandoned gas or oil well is identified on the land that is the subject of the subdivision application, the applicant must include a map that shows the actual well location, as identified in the field, and the setback established in ERCB Directive 079 in relation to existing or proposed building sites.
- If an abandoned gas or oil well(s) is identified on land that is the subject of the subdivision application, the Subdivision Approving Authority must refer a copy of the subdivision application to the Licensee(s) of Record. The referral must include the applicant's contact information.
- The information is not required if it was submitted to the same subdivision authority within the last year.

Decision Process

- Effective November 1, 2012, the Subdivision Authority may not approve subdivision applications unless the lots comply with the setback directed by ERCB Directive 079.

Development Permit

Application Process

- New development permits for buildings larger than 47 sq. m. (500 sq. ft.) and for additions to buildings that will as a result of the addition become larger than 47 sq. m., must include documentation from the ERCB with the application identifying the presence or absence of abandoned wells. Documentation can be obtained from the ERCB using its online Web Viewer. The information is not required if it was submitted to the same development authority within the last year.

Decision Process

- The Development Authority may not approve a development permit for an application received after the coming into force of the amended regulation for buildings larger than 47 sq. m. and for additions to buildings that as a result of the addition becomes larger than 47sq. m., unless the development complies with the setback directed by ERCB Directive 079.

- Buildings that existed prior to the coming into force of the amended regulation, that are destroyed to 75 per cent of value, if rebuilt must comply with the setback directed by ERCB Directive 079.
- If an application is made to alter or add on to a building larger than 47 sq. m. and for an addition to a building that as a result of the addition becomes larger than 47 sq. m. that existed prior to November 1, 2012, which does not comply with the setback directed by ERCB Directive 079, the Development Approving Authority may approve the application with the acceptance of a lesser setback distance if the Well Licensee of Record, through consultation with the applicant, is recommending support for a lesser distance, and provided it does not further encroach on the abandoned well.

What applications need to comply with new setbacks?

- Subdivision applications received on or after November 1, 2012.
- Development permits for buildings greater than 47 sq. m. and additions that result in the building being larger than 47 sq. m. received on or after November 1, 2012.

What is exempt from setbacks?

- Any developments for a building that is smaller than 47 sq. m.
- Subdivision lot line adjustments.

Building Permit Requirements

A Building Permit is an important part of the process, as it will ensure that your project is inspected and that it meets or exceeds the standards as prescribed by the Alberta Building Code, and any other relevant documents.

The following is required is required to accompany the building permit application:

- Site Plan which shows the following:
 - Legal description of the property
 - Civic address of the property
 - Identification of all roads abutting the property
 - Building footprint with setbacks from property line
 - Identification of all utility right-of-ways and easements within and abutting the property
 - Location and dimensions of existing buildings including front, rear, and side yard setbacks
 - North arrow, scale, and date of drawing
 - Location of utilities
 - Site Grading (if applicable)
- Building Plans which show the following:
 - Top view of your project
 - Front and side elevations of your project
 - Window and door locations
 - What material will be used for construction
 - Details of how the project will be built
 - Scale, date of drawing, legal and civic address

Please note that these are the minimum requirements, and the Town may require more information/ documents to be able to process your application.
