

NOTICE OF CONSTRUCTION

5th Street SE 000–200 Block Infrastructure Upgrades 2026

5 Street SE from Broadway Avenue to 3 Avenue SE

Town of Redcliff

Dear Property Owner / Occupant,

UG Excavating Ltd., on behalf of the Town of Redcliff, will be commencing construction for the 5th Street SE 000–200 Block Infrastructure Upgrades 2026 project.

The work generally includes water and sanitary infrastructure replacement, road reconstruction, and related surface restoration within the project limits.

CONSTRUCTION SCHEDULE

Construction is tentatively scheduled to begin on:

Planned Start Date: July 20, 2026

Anticipated Completion Date: October 19, 2026

All dates are weather-dependent and may be adjusted due to site conditions.

Working Hours:

Monday to Saturday | 7:00 AM – 7:00 PM

Sunday work may occur if required.

ROAD CLOSURE, ACCESS, & PARKING

5 Street SE will be closed within the construction limits for the duration of the project. Broadway Avenue and 3 Avenue SE are expected to remain open.

1 Avenue SE and 2 Avenue SE will be local traffic only during construction. Residents and the public are asked to follow the posted detour signage at all times. Detours and traffic control may be adjusted as required during construction, so please follow all signage and directions provided on-site.

Vehicle access from the front of properties and driveways within the construction area will not be available during construction. Residents are to use rear laneway access and adjacent streets for vehicle access and parking where available. Rear laneways are expected to remain unaffected.

Pedestrian access may be restricted at times, as sidewalks and frontages within the work area will be impacted and eventually replaced. Please use caution around the construction area and follow any posted signage or direction from site personnel.

Residents may need to park outside the closure area or on adjacent streets during construction. The Town has also provided a temporary parking area for residents who require it, located east

of Mitchell Street SE between 4 Avenue SE and 5 Avenue SE. Please refer to the attached map and use only the designated parking area.

TEMPORARY WATER SERVICING

To maintain water service during construction, a temporary water system will be installed for affected properties within the project limits. Separate notices will be delivered for temporary water connection work and the actual switchover to the temporary water system.

Temporary water service lines will run parallel to the street and across properties. This is necessary to provide continuous water service while the existing water main is being replaced.

Please use caution around temporary water lines, as they may create a tripping hazard. Do not tamper with, move, disconnect, play with, or disturb the temporary water lines, hoses, or related equipment.

GENERAL CONSTRUCTION IMPACTS

Residents can expect:

- Road closure and restricted access within the construction limits
- Increased noise, dust, vibration, and construction activity
- Heavy equipment and construction traffic in the area
- Temporary pedestrian restrictions as work progresses
- Temporary water servicing setup and related equipment on or near properties

UG Excavating Ltd. will make every effort to minimize inconvenience and complete the work safely and efficiently.
